**GOOD FOOTING
IS SAFE FOOTING!**

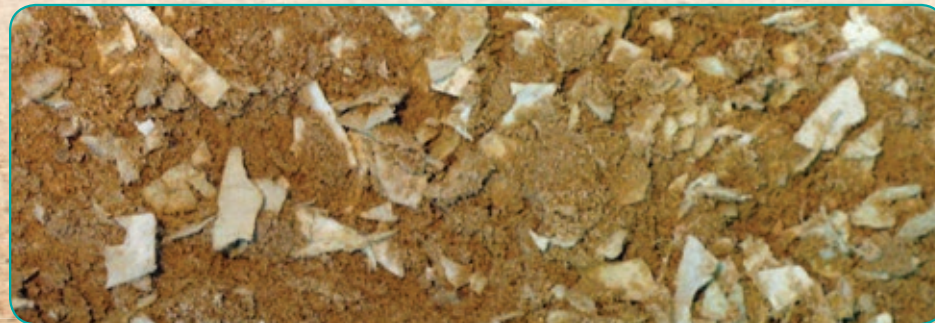

WORLD CLASS PRODUCTS

For over 23 years we have been supplying horse arena builders worldwide with our arena footing additives. GGT-Footing® is used at international horse show facilities and for FEI World Cup Jumping and Dressage events. We continually improve our products by utilizing our customer's feedback to develop new and better additives.

Our Polyester fiber mixtures have been used for more than 23 years as footing for multiple riding disciplines. We offer different product types for your particular discipline, i.e. jumping, dressage, general arena riding and even for racetracks.

Our products endure the test of time, resist packing, provides optimal concussion relief to help minimize joint and tendon stress on the equine athlete.

We are confident that our product will improve equestrian success while promoting and protecting the health of your valuable equine athletes.

GGT-Footing® Geo

A blend of assorted and chopped nonwovens to provide cushion and impact resistance. It retains water to reduce dust, prevents packing.

GGT-Footing® Pleasure

A budget blend and our ecological alternative for small private stables and studfarms. This footing blend offers all features of our Geo-blend, is economically priced and suitable for many disciplines. It provides structure to your sand and helps prevent slippage.

GGT-Footing® Dressage

A blend of assorted and chopped nonwovens with a lower content of fibers. This footing blend offers all features of our Pleasure-blend but is designed to improve shear strength of your riding surface while keeping it perfectly smooth with a little energy rebound to support the soundness and well-being of your horse during daily workouts.

GGT-Footing® Jumper

A blend of assorted and chopped nonwovens with a higher content of fibers. It offers all features of our Dressage-blend, adding higher slide and shear strength, as well as stability to the footing. It offers perfectly adapted spring for energy rebound to support horse and rider in jump-off and landing areas, protecting joints and ligaments.

GGT-Footing® Western

A blend of assorted and chopped nonwovens. It offers all features of our Geo-blend but comes with a special chop-size to facilitate the specialties of western disciplines.

Benefits:

- Reduces dust
- High water storage capability
- Optimal impact resistance
- Higher slide strength and additional stability
- Prevents packing
- Offers perfectly adapted spring for energy rebound
- Supports your horse's joints and ligaments.
- Facilitates a strong jump and a secure landing
- Improves the shear strength of the surface

GGT-Footing® Products

Our GGT-Footing® products improve riding ring surfaces, paddocks, round pens, trails and racetracks. All GGT-Footing® products are designed to improve soundness and perfor-

mance. Today's findings from scientific research on equestrian footings can be combined with specialists practical experiences to produce a sound and good surface. Still, advice on the construction of riding arena surfaces has been based on experience and personal opinion. Experience and know-how is important to create a good riding surface, maintenance and moisture content is key to performance of any riding ring.

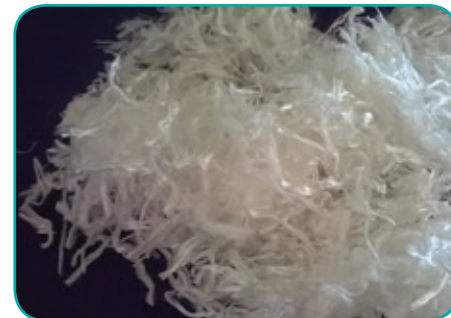

Due to these variables there is no single recipe for a perfect riding arena. With our experience gained in over 23 years of supporting the equine community, we found that the products we offer are the best solution – economically and environmentally – to help you prevent lameness of your horse and minimize veterinary bills.

GGT Fibers

Fibers act like a root system in the sand and primarily improve the stability and shear strength of equestrian surfaces. All GGT-Footing® surfaces can be tailored using different types of fibers

GGT PES Fibers

GGT BIO Fibers

We offer tailored arena footing products and professional expertise of our partnered arena builders to help you thru your arena construction process. GGT-Footing® is a complimentary addition to riding arenas and enhances the integrity of your footing when mixed with sand.

(Standard, Elastic, Biodegradable) in order to meet a large variety of sands or to increase flexibility and spring. There is a recipe for every unique set of circumstances.

*Before installing
GGT ARPOLITH*

GGT-Footing®
ARPOLITH®
The Organic Moisture Control Product

GGT's Arpolith

brings a new meaning to the Term **Moisture Control**. GGT Arpolith is an organic volcanic ash material and can extend the times between watering your arena, while keeping your arena at the right moisture level. Used in Europe for over 10 years. In colder climates the characteristics of Arpolith mixed with the magnesium chloride extend the life of both additives, while preventing your arena from freezing. Arpolith can be used with a variety of sands.

Works well with
the GGT-Footing® Textile
and is suitable for all
disciplines!

GGT-Footing®
ButterflyMat
Professional Riding Arena Mat

The use of arena mats can significantly reduce the cost of traditional layering methods with gravel, extra sand and the labor involved in the construction. By utilizing the GGT Butterfly Mat™ system, one can protect

their horse's joints and tendons from long term concussion and instability due to slippage from traditional footing surfaces. The typical force of a striking hoof is absorbed by the mat. This plays an important

role in maintaining soundness. GGT ButterflyMats are manufactured from recycled material. In this way, our company actively contributes to environmental protection and sustainable development

- Benefits:**
- recycled material
 - UV resistant, frostproof, re-usable
 - minimizes costs for base construction
 - base protection
 - concussion relief

Our GGT ButterflyMats are a state of the art product that will completely revolutionize the way that you install your GGT surfaces. It brings a new level of efficiency to installing a new arena base. Not only does it provide stability and drainage, but it can also reduce the thickness of your base necessary.

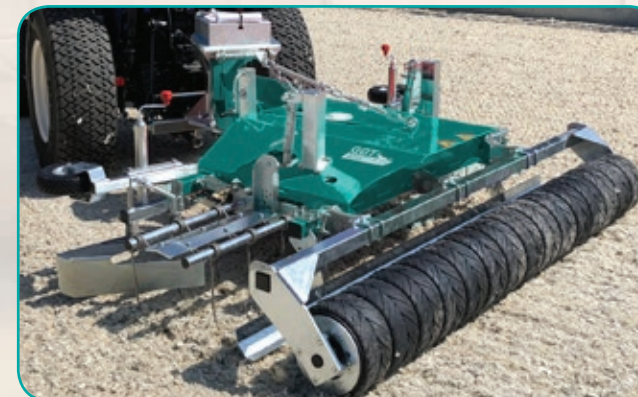

GGT-Footing® Arena Conditioner

keep your arena in perfect shape!

Meet the perfect companion for your GGT-Footing®. Constant maintenance is vital to keep your arena in perfect shape and GGT-Footing® needs a proper harrow with adjustable tines and teeth, as well as a roller to keep the footing mixed properly. With our specialized GGT-Arena Conditioner you can keep your beautiful footing in its best condition. The GGT-Arena Conditioner is available in several sizes.

- Aerate your sand to create the lofty feeling you love.
- Tailored to meet all ground conditions regardless of depths and compaction.
- Adjustable teeth and tines are designed to intermix GGT footing® and soil.
- Can be pulled by tractors, ATV's, UTV's and lawn tractors.
- Re-level and fill in divots in your arena footing.

GGT-Footing®

Separation Layer

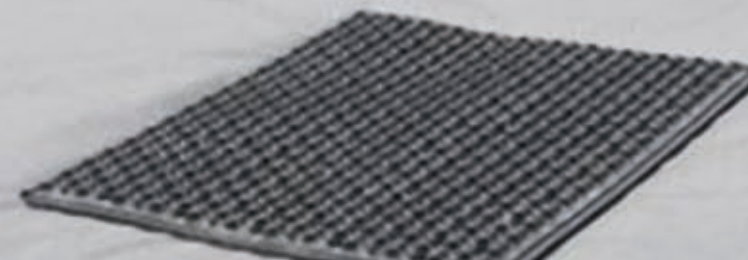

Provides proper separation of aggregates and efficient drainage

When it comes to providing proper layer separation and efficient drainage in equestrian arena building applications, we believe this product is one of the best affordable solutions in the industry.

Our puncture resistant material keeps the multiple layers involved in equestrian arena construction from inter-blending, while still allowing for efficient drainage.

Benefits:

- Small pore size & high flow rate allow for efficient drainage
- Stabilizes, separates and reinforces
- Rugged material maintains puncture resistance
- Economical alternative to graded aggregates & sand filters

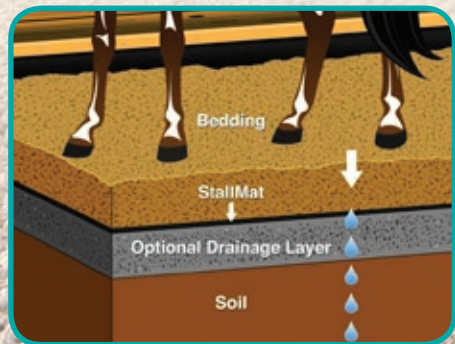

GGT-Footing®

Stall-EZ Stable Mats

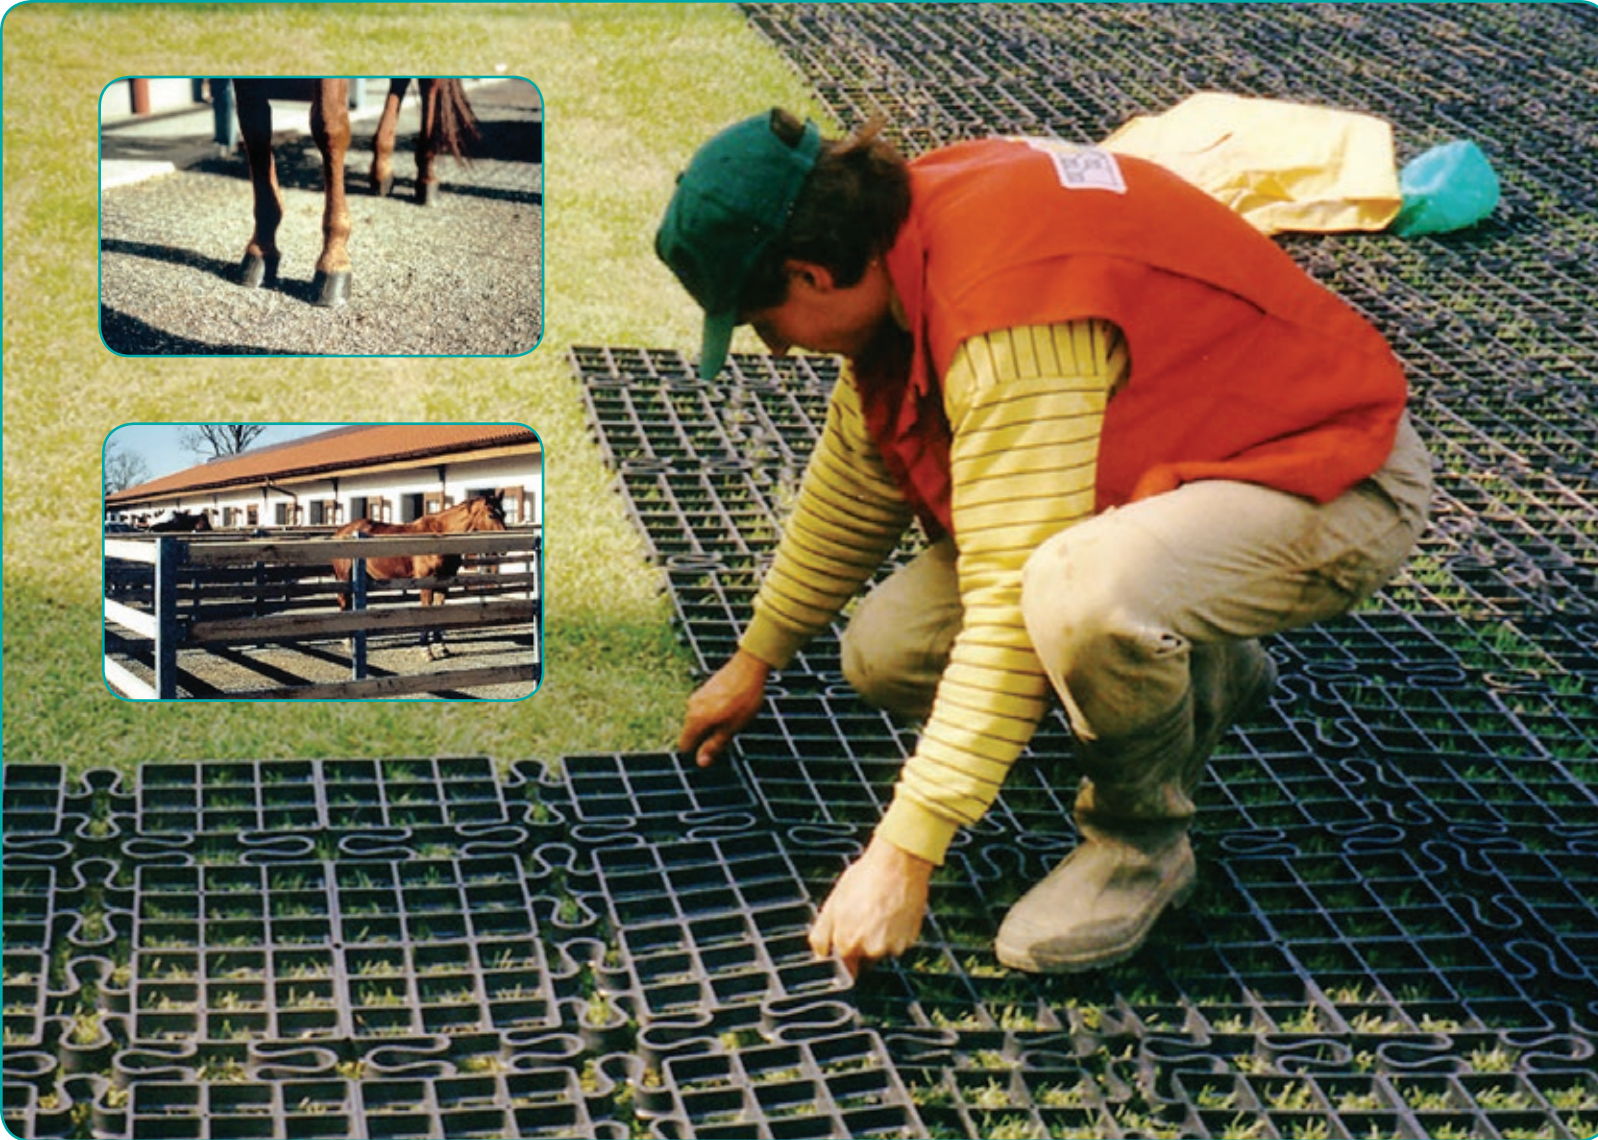

keeps your Stable easy to clean!

GGT now has a solution for your stable surfaces! Our Stall-EZ Stable Mats are an easy to install solution for providing matting to your stalls or barn aisle. Available to cover any size floor space, we believe our Stall-EZ Stable Mats are the best affordable solution for providing mats in your barn!

- Covers any type of floor surface, including cement aisles.
- Easy to install and handle.
- More beneficial than rubber mats.
- Water permeable.

GGT-Footing® **GRID FAMILY**

**GGT IS NOW OFFERING
TWO GRIDSYSTEMS TO
ACCOMMODATE YOUR NEEDS**

GGT "Paddock Grid"

Used for paddocks, access areas like stall aisles and riding trails. The Paddock Grid comes with the patented Joint Expansion System to ensure an easy and quick install without tensions and strains. The "Paddock Grid" can be used as a durable and highly permeable separation layer and comes with a 10 year warranty.

GGT "Surface Grid"

Used for permanent or temporary parking lots, walk-ways, tent-, stable or camp areas. Flexible and interlocking joints make it an easy and quick "to install"- product that will almost perfectly adapt to any surface (grass, sand, gravel) without tension and strain.

Top conditions for Horse and Rider!

fibrous structure and sand grains complement one another perfectly, are the foundation for strong training and ensure that horses are completely sure-footed.

The advantages for stud farms and equestrian centers are clear:

GGT-Equilastic Footing, which is manufactured from strictly controlled new materials, is extremely colorfast and weather resistant, even in outdoor arenas. Even high volumes of riders or low temperatures do not compress the ground, the elasticity remains unchanged and the long-term maintenance costs are low.

Our Equilastic Mix is a combination with our GGT Geo chopped nonwovens. That way, you get a blend that is highly versatile in riding surfaces which thus will be improved. Pre-mixing the materials in our plant optimally combines the advantages of both products in a user-friendly way. The

GGT chopped nonwovens improve shear strength as well as moisture retention of the footing.

The product sustainably prevents compacting of the riding surface and has been proven for decades as an additive in riding surfaces around the world. By adding GGT-Equilastic the surface will get slip resistant and stable without getting too deep. The product offers good spring and energy recovery in the sand.

The best: Incorporating the footing to riding surfaces is easy.

It is milled into the already available sand and serves as a central layer. Thanks to its long service life, the material can be used with fresh sand several times and can be removed again.

The material has been certified according to the required environmental/health assessments!

TUNE UP YOUR FOOTING!

Healthy training and effective progress require an optimal riding surface.

Choose a sand-footing mix with quality "Made in Germany": GGT-Equilastic Footing supports horse and rider with the perfect balance between surface elasticity and stability. Spine, tendons and joints are effectively cushioned – even under the heavy strains caused by movement.

Unwanted rolling effects are avoided with the combination of footing and sand. The

• Elastic • Sure-footed
Loose • Easy-care • Durable
