

### ATV ONE CARE SLIM

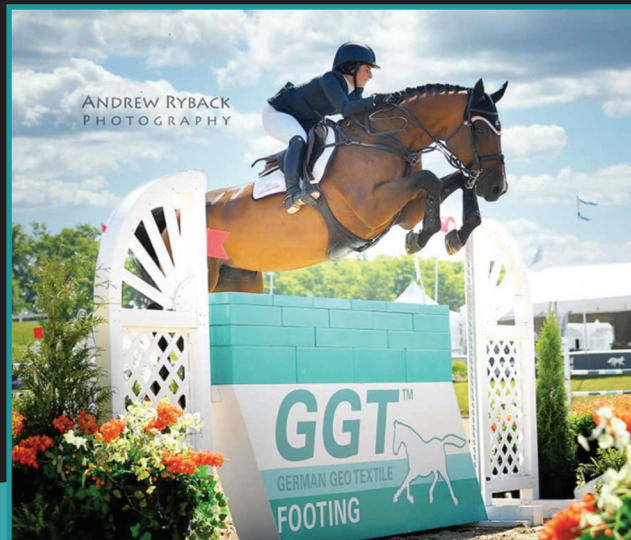

The Slim is our riding conditioner driven by a Honda gas engine with low emission levels and electric starter. This all-in-one gives you the flexibility of an easy to use tractor with a dynamic and adjustable arena conditioner. Ideal for tight conditions.

Our Butterfly Mats™ are a state-of-the-art product that will completely revolutionize the way you install your riding surfaces. Our mats bring a new level of efficiency to installing a new arena base. Not only do they provide stability and drainage, but can also reduce the thickness of your arena base.

## Soundness and Performance – That’s the Focus!

Since the inception of riding arenas, people have experimented with a variety of materials; with the ultimate goal of creating the perfect riding surface. After 25 years of testing, listening to equine professionals and veterinarians; we have found that our materials and products provide the best solution for thousands of our customers.
