

WATER-FREE FOOTING

It doesn't get any easier than this! We have water-free footing available to ship in Super Sacks. Call us for your needs!

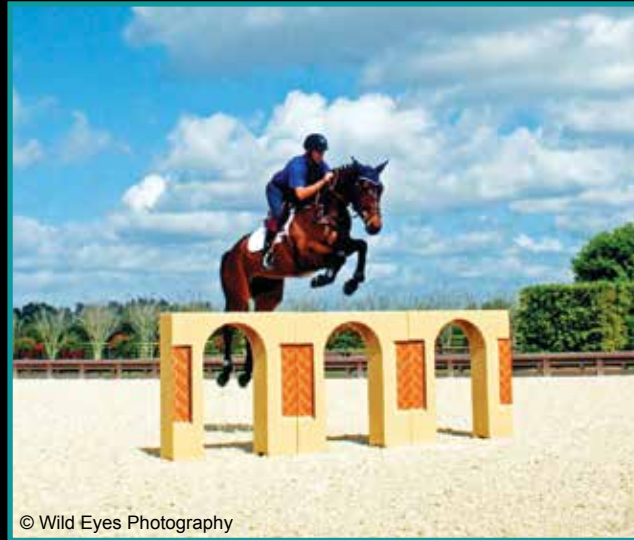

GGT Footing in collaboration, with our arena builders, is proud to now offer pre-blended material throughout the country.

GGT Footing recommends the importance of following the science of testing. We have several consultants who will analyze and consult with you on sand. The sand quarries have variables in their products that can make or break the success of your installation. Call us for the names of internationally known soil specialists.

Soundness and Performance – That's the Focus!

Since the inception of riding arenas, people have experimented with a variety of materials; with the ultimate goal of creating the perfect riding surface. After 25 years of testing, listening to equine professionals and veterinarians; we have found that our materials and products provide the best solution for thousands of our customers.

GROOMERS

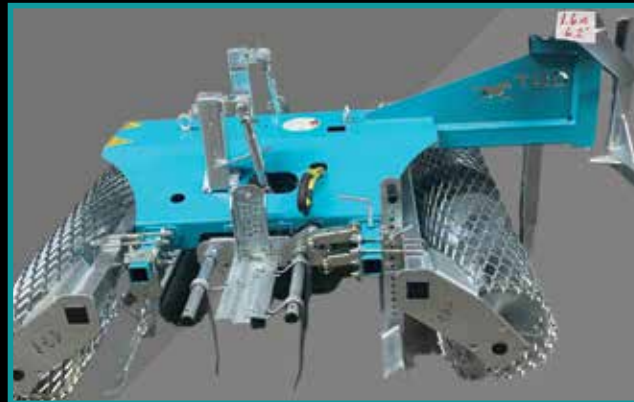

Condition Your Arena with a Groomer Like the Pros!

ONE CARE PRO

The work horse of our arena conditioner lineup. Trusted by 100's of equestrian professionals and equestrian competition venues nationwide.

TWIN CARE PRO

Our Top-of-the-Line arena conditioner. The double-roller design incorporates every facet of arena grooming into one unit, ensuring your arena is always in prime condition.

Budget Mat is designed mainly for outdoor riding rings. It acts as a separation layer with a rough surface for better grip should the hoof penetrate thru the footing. Special drainage channels on the downside allow water run off in multiple directions. Cup design helps to retain water. **Scientifically proven to offer concussive relief and energy rebound.**

GGT Budget Mat (w/ holes)

- no tongue and groove
- weight: 44 lbs. per mat
- 50/skid
- L x W x H: 46.5" x 33.5" x 1.6"
- covers 1 sq meter = 10.76 sq ft

FIBER & GEOTEXTILE BLENDS

GGT Footing – Offers the finest quality polyester textile fabric and fiber, arena mat systems and top of the line arena conditioners.

GGT Footing – Products are mixed with a high-quality sand designed to support the horses' joints from concussion.

After 25 years of research and development **GGT Footing** – is proud to offer blends that are custom tailored to each of our clients specific discipline needs.

GGT Footing – Has a strong network of consultants that we work with, that can assist in arena building, ebb and flow systems, installation, sand consulting and facility design.
